Small Steps... Big Growth!

Build Confidence in Solving Problems Independently

When children learn to think, try, and find solutions on their own, they become confident, capable and ready for new challenges – in school and in life!

Simple & Practical Ways You Can Try at Home

1 Let them think first

When they face a problem, pause before jumping in. Give them time to think and come up with their own ideas.

Try asking, "What do you think we can do?"

2 Turn everyday moments into problem-solving

Involve them in real-life situations — planning a trip, figuring out a budget, fixing a small issue at home, or choosing the best option from a list.

3 Use puzzles, brain teasers & logic games

Sudoku, riddles, coding games, word puzzles and strategy games help them think critically and see different possibilities.

4 Encourage 'I can try' attitude

When they make a mistake, help them see it as a learning opportunity. Praise their effort, not just the result.

Mistakes help us grow!

5 Give age-appropriate choices

Let them make small decisions — what to wear, what to read, how to spend their free time. It builds decision-making muscle and self-belief.

6 Be their cheerleader

Listen, encourage, and remind them that they are capable of finding solutions. Your belief in them makes a big difference.

Independent thinkers today...
Confident problem solvers tomorrow!

Small nudges. Big impact. Together we can!

THANK YOU FOR YOUR CONTINUED SUPPORT AND PARTNERSHIP I WARM REGARDS I SCHOOL / L & D TEAM
